Orlando, FL | (954) - 706 - 4646

PROFILE

Developer specialized in Front End Design with experience in insurance and startups. Skilled at working in cross-functional, multicultural and remote teams, managing projects, solving problems and crises, making decisions under pressure, and negotiating with others. Highly adaptable, excellent communicator, and both a systemic and systematic thinker. Bilingual (ES/EN)

TECH SKILLS

Programming Languages: Java, Python, JavaScript, C, Haskell, HTML / CSS; **Technologies:** Next.js, Node.js, Tailwind CSS, Firebase, Pygame, Git, GitHub, VS Code, Playwright, Castle.io, ZeroStepAPI; **Practices:** Agile, TDD, OOP, Debugging

EDUCATION

Bachelor of Science in Computer Science 2021 - 2025

University of Central Florida, College of Engineering and Computer Science

SPECIAL PROJECTS

LOOK UP App, Senior Design - Front end Developer/Front end Designer, 2024-2025

- Designed and implemented the UI for a React Native mobile app that lets users scan nearby planes on a 2D map or in AR by pointing their phone at the sky, as part of a 4-person team.
- Built and iterated on the search and filter system in TypeScript through ~4 rounds of optimization, improving navigation and accessibility.
- Designed the plane information cards displaying live flight data — flight number, altitude, airline — pulled from the Flightradar24 API.
- Solved inconsistent third-party flight data by iterating on API integration until payload parsing and display were reliable.
- Doubled data retrieval speed by tightening the integration between front-end and back-end systems.

Learn the Markets, Custom Company Website, Full Stack Developer, 2024 - 2025

- Built a fully responsive website for Learn the Markets using React, Tailwind CSS, HTML, and Site, increasing user engagement by 70%.
- Led the complete development website lifecycle for one year after completion, including requirement gathering, UI/UX design, development, deployment, and maintenance.
- Designed, developed, and managed the website for a four-person startup under a one-year contract.
- Provided ongoing post-launch support by implementing user feedback and feature updates being able enhance functionality and user experience by 15%, including redesigns, modifications, new animations, and policy updates.

WORK EXPERIENCE

GEEK'D, Shift Leader / Event Organizer | Orlando, FL, 2024 – Present

- Led and organized ~5 events/tournaments including Pokemon, One Piece, Union Arena, Gundam TCG, and Riftbound a week and 3 large events per month of over 40 participants.
- Designed and implemented the first process for tournaments, optimizing the existing operational processes and enhancing participant experience, resulting in 30 consistent players per event.
- Promoted the tournaments and online events via Discord increasing participant turnout by 300% and store visibility in 3 months.

SWE Intern, Spot Pet Insurance | Miami, FL, 2024

- Designed and optimized a customer-facing web page solving ~60 tickets in 3 months including quote form & landing pages using TypeScript, JavaScript, React, Next.js.
- Implemented automated (E2E) testing with Playwright resulting in the elimination of code reviews by 98%.

- Enhanced security by integrating castle.io and ZeroStepAi, ensuring compliance with industry standards, IP and proxy analysis, and eliminating an actual scam threat for the company.
- Collaborated with cross-functional teams, Design, Product, QA, of about 25 people improving user experience by 10% and maintain code quality.
- Debugged production issues by user testing and black box testing, reducing customer-reported problems by 15%.
